

Fentanyl Response and Decon **4HRS**

The main purpose of this course is to help protect responders who may encounter fentanyl during a response, and with consequence management in the form of decontamination. This objective is achieved by providing information to help detect the presence of fentanyl, identify hazards associated with those substances, and mitigate those hazards and contamination. This course is intended personnel in the counterdrug nexus and individuals who may find themselves needing to decontaminate fentanyl contaminated surface as part of their duties
